Notes: Newly diagnosed cancer cases (primary invasive cancers and in situ urinary bladder cancers) in 2002-2006 were classified using the International Classification of Diseases for Oncology, Third Edition (ICD-O-3). The primary site and type groupings followed the site definitions used by the Surveillance, Epidemiology, and End Results (SEER) Program of the National Cancer Institute. Incidence rates are per 100,000 population and were age-adjusted to the 2000 United States standard million population. All rate comparisons and determinations of statistically significant differences followed 95% confidence interval (CI) comparison methods for dependent and independent populations as suggested by the Pennsylvania Department of Health. Data sources included the Erie County Department of Health, the Pennsylvania Department of Health, and the United States Census Bureau. State and federal agencies specifically disclaim responsibility for any of the analyses, interpretations, or conclusions that appear in this publication.

** = The number of cases is less than 20 and the corresponding rate is statistically unreliable.

Green = Significantly lower than the rate for Pennsylvania.

Orange = Significantly higher than the rate for Pennsylvania.

Blue = Significantly lower than the rates for Erie County and Pennsylvania.

Red = Significantly higher than the rates for Erie County and Pennsylvania.

Notes: Newly diagnosed cancer cases (primary invasive cancers and in situ urinary bladder cancers) in 2002-2006 were classified using the International Classification of Diseases for Oncology, Third Edition (ICD-O-3). The primary site and type groupings followed the site definitions used by the Surveillance, Epidemiology, and End Results (SEER) Program of the National Cancer Institute. Incidence rates are per 100,000 population and were age-adjusted to the 2000 United States standard million population. All rate comparisons and determinations of statistically significant differences followed 95% confidence interval (CI) comparison methods for dependent and independent populations as suggested by the Pennsylvania Department of Health. Data sources included the Erie County Department of Health, the Pennsylvania Department of Health, and the United States Census Bureau. State and federal agencies specifically disclaim responsibility for any of the analyses, interpretations, or conclusions that appear in this publication.

** = The number of cases is less than 20 and the corresponding rate is statistically unreliable.

Green = Significantly lower than the rate for Pennsylvania.

Orange = Significantly higher than the rate for Pennsylvania.

Blue = Significantly lower than the rates for Erie County and Pennsylvania.

Red = Significantly higher than the rates for Erie County and Pennsylvania.

Erie County Municipality Cancer Incidence Statistics, 2002-2006

Municipality	Liver & Intrahepatic Bile Duct			Hodgkin Lymphoma			Cervix Uteri			Testis
